

MS Interior

COMMERCIAL INTERIOR ARCHITECTURE

COMPANY PROFILE

Commercial Spaces, Designed to Perform.

Commercial interior architecture and design for workplaces,
retail, hospitality and business environments.

WHO WE ARE

A commercial interior studio built around how businesses actually work.

MS Interior is a commercial interior architecture and design studio focused on creating spaces that balance function, identity and experience. From workplaces and retail environments to hospitality and specialized commercial spaces, we transform business requirements into thoughtful, purposeful interiors.

Commercial Focus

Our work is centered on commercial environments and business requirements — not residential styling. Every decision is measured against how the space has to perform on a working day.

Functional Planning

Every space is designed around movement, usability and operational efficiency, so the floor plate supports the headcount it was planned for.

Distinctive Design

We create environments that communicate the character and identity of each business, using material, light and proportion rather than decoration.

End-to-End Delivery

From concept and planning through design development and execution coordination, the work is handled as one package with a single point of responsibility.

WHAT WE DO

Five disciplines covering the full arc of a commercial interior.

01

Commercial Interior Design

Complete interior design solutions tailored to the operational and visual requirements of commercial spaces.

02

Office & Workplace Interiors

Functional and contemporary work environments designed around productivity, collaboration and company identity.

03

Retail Interiors

Customer-focused retail environments designed to strengthen brand presence and improve the shopping experience.

04

Hospitality Interiors

Restaurants, cafés and hospitality spaces where atmosphere, circulation and service flow are planned together.

05

Interior Architecture & Execution

From spatial planning and material selection to detailing and execution coordination, we bring the design into reality.

WHERE WE WORK

Areas we are most often asked to plan.

**Corporate Offices**

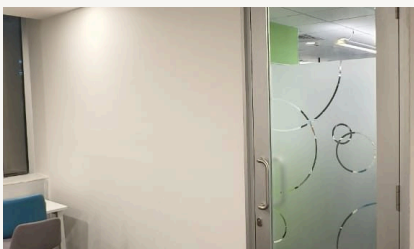

Open workstations and support areas

**Glass Partitions**

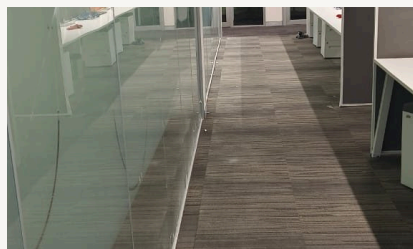

Framed glazing and manifestation film

**Meeting Rooms & Cabins**

Acoustic separation with daylight

**Reception & Breakout**

Arrival areas and informal meeting space

**Circulation Planning**

Corridors, zoning and floor plate layout

**Writing & Display Walls**

Boards, pinboards and feature panels

Photographs on this page are from MS Interior project sites.
